

2020 CEJA ACTION VOTER GUIDE:

Fighting to Protect our Climate Future

Your vote in 2020 will shape our future.

Since 2016, communities across California and the nation have mobilized to protect our values. People have taken to the streets to defend the lives of black queer and trans folks, families, mothers, women, sons and men; courageous migrants who honor their survival and their families' futures over borders; and for a world that upholds generations of indigenous stewardship and futures to restore our water, air and land for a climate to sustain many future generations.

2020 is a year for us to continue our political action by amplifying our voices. On March 3rd, Californians have the opportunity to shape the national political landscape by voting for environmental and social justice champions and key ballot measures. In April, we need to make sure everyone in our community is counted in the U.S. Census to ensure California continues to get resources to help our most vulnerable communities. On November 3rd, voters will cast their vote to define our collective future and pave the way for more progressive, equitable leadership in our state and country.

ON MARCH 3RD, VOTE TO ELECT PROACTIVE ENVIRONMENTAL JUSTICE CHAMPIONS:

Monique Limón

Senate District 19

Abigail Medina

Senate District 23

ENVIRONMENTAL JUSTICE PRINCIPLES

Prioritize and value harm prevention, human health, and improved quality of life

Do no harm
